## 💼 Experience

*Application Specialist – Elektroistribucija D00EL, Skopje*

November 2024 – Present

- ❖ Contributing to the development and optimisation of enterprise-level web applications using Angular for the front end and .NET for the back end.
- ❖ Participating in Agile/Scrum workflows via Jira, ensuring transparent task management, sprint planning and timely delivery of features.
- ❖ Utilising Bitbucket and Git for version control, collaborative code reviews and maintenance of clean code repositories.
- ❖ Conducting system and business-process analysis of the company's core activity — electricity distribution — identifying functional gaps and performing data-driven evaluations to improve workflows and applications.
- ❖ Collaborating with the team to document technical updates and process improvements using Confluence, supporting continuous team development and system refinement.

*Translation Project Management Intern – Transhauza, Skopje*

April 2023 – September 2023

- ❖ Assisted in coordinating translation projects from initial client request to final delivery, ensuring quality and timely completion.
- ❖ Managed communication with clients and translators, aligning project requirements and maintaining professional correspondence.
- ❖ Participated in the organisation and tracking of translation workflows, contributing to process efficiency and client satisfaction.
- ❖ Gained practical insight into business operations, project management and quality assurance within a professional translation agency.

*Project Management Intern – Project Managers Association of Macedonia (APMM), Skopje*

January 2022 – September 2022

- ❖ Assisted in organising and facilitating professional training programs and certification workshops, gaining hands-on experience in event planning and participant coordination.
- ❖ Supported project coordination and internal communication, ensuring smooth delivery of educational modules and mentoring sessions.
- ❖ Took part in project planning, execution and progress monitoring, applying practical project-management principles aligned with IPMA standards.
- ❖ Strengthened skills in stakeholder collaboration, timeline management and structured documentation within a professional organisational framework.
